# Versatile Desktop Label Printers

PT-D410, PT-D460BT, and PT-D610BT desktop label printers offer versatile solutions for all labelling needs, including for SOHO/home office, large office, retail environments, and as well as for wider business vertical applications.

## Simple one-touch solutions

With a built-in QWERTY keyboard and large graphical display which includes a print preview, these PT-D series label printers are user-friendly and designed for ease of use and fast typing with optimal desktop handling.

## Expanded options for label creation

PT-D series desktop label printers are perfect for straightforward standalone use. These label printers support PC and Smartphone connections\*.

With additional label design functions, these label printers can be paired with Brother's iPrint&Label app and P-touch Editor 6.0 software for expanded options for creating labels beyond the basic use.

Specially designed and ready-made templates are available for use. Labels can also be customisable to fit any individual requirements.

\* PT-D410 offers USB connectivity only.

\* PT-D460BT and PT-D610BT offer both USB and Bluetooth connectivity.

# PT-D Series line-up

PT-D series label printers offer a diverse range of labelling features for home offices, larger offices, co-working spaces, and retail environments. With three label printers to choose from, greater flexibility, connectivity, and functionality are offered.

Each label printer is designed with specific environments in mind and is equipped with features to suit any end-user's needs. Select from the basic standalone entry model, PT-D410 to the more advanced model, PT-D610BT to print labels using smartphone apps.

- Asset management labels
- Personal item labels
- Name tag labels
- File and folder labels
- Drawer labels
- Office signage labels

### Applications include:

- Product name labels
- Product information labels
- Shelf edge labels
- Stock management labels
- Signage labels
- Discount pricing labels

# Software and applications

## P-touch Editor 6.0

Create durable labels with a P-touch label printer connected to a computer via USB connection.

P-touch Editor 6.0 is a complimentary software which offers newly updated features ranging from an increased number of specially designed templates, additional numbers, time and date, and barcodes with an overall refreshed user interface for a truly connected solution for creating customised labels.

### Key features:

- Wide range of pre-designed templates for a variety of home office and business applications.
- Customisable templates for flexible editing with over 1200 symbols and more than 30 fonts.
- Easy retrieval of labels created in the past, or share labels to Brother iPrint&label apps with a smartphone.
- Import excel database or any other databases directly into P-touch Editor 6.0 software.
- Straightforward 1D and 2D barcodes label creation.
- Create multi-lingual labels containing different language symbols using Unicode (UTF-8).
- Customise labels with a company logo.

## iPrint&Label App

Brother iPrint&Label is a free mobile app that enables the easy creation and printing of labels from Apple® iPhone or iPad® via Bluetooth connection to a Brother P-touch label printer.

Create labels using P-touch Editor 6.0 software and share to a smartphone or tablet to print, save or edit on iPrint&Label mobile app for a fully integrated solution.

### Key features:

- Fully customisable layout, including the option to add boxes, lines or move objects, as well as resizing or rotating.
- Access to pre-designed templates.
- Hundreds of symbols and clipart.
- Add images, photos and logos to label.
- Add barcodes to labels, including QR code and 1D barcode.
- Improved and modern looking user interface for ease-of-use, including the ability to quickly re-print saved or frequently used labels which save time.
- Import contact details directly from a smart device onto labels.
